BUILT ONCE IN CLAUDE

Two agents. Two ways to run them.

I build both agents once, as Claude skills. Start simple and move them to the cloud later without rebuilding.

01 What they do

Paperwork agent
Every order, start to finish

Order comes in → Invoice made and sent → UPS label or trucking BOL → Filed in the order's folder → Customer gets tracking

Lead generation agent
Finds buyers, hands them to you

Searches your buyers' forums → Messages people where allowed → Tracks every reply → Tells you when one is ready

02 Where they run

SAME AGENTS EITHER WAY

In your Claude app
Cowork, inside the Claude desktop app

Simplest, start here

CLAUDE DESKTOP APP — SAMPLE

New order 1048, two pallets to Ridgeway Supply.

Done. Invoice sent, BOL filed, shipment notice ready. Send it?

YOU TALK	Type or talk in the Claude app
IT RUNS	On your computer, while Claude is open
USAGE	Included in your Claude plan

GOOD
- Nothing new to set up
- No second bill
- You see every step

TRADE-OFF
- Pauses when your computer is off
- You check in from the app

Always on, in the cloud
Text them from Slack or WhatsApp

When you're ready

SLACK OR WHATSAPP — SAMPLE

Lead ready for you. A forum member replied asking for pricing.

Send me the thread.

YOU TALK	Message them like a coworker
IT RUNS	On a cloud server, around the clock
USAGE	Pay as you go through Claude, only when there's work

GOOD
- Works while you're away
- Alerts land on your phone
- Nothing to keep open

TRADE-OFF
- A usage bill on top of your plan
- A bit more setup

The dashboard from the video can sit on top of either one, whenever you want it.

03 The software

WE CONFIRM EACH ONE ON THE CALL

- **Claude** you have it
- **Your email**
- **Your files** and one tracking sheet
- **UPS and your trucking company**
- **Your invoicing software** if you use one
- **Slack or WhatsApp** cloud option only

04 Setup

1. **15 minute call** on your software, how you invoice and ship, and your forums.
2. **I build both agents** as Claude skills.
3. **We test on sample orders** before anything reaches a customer.
4. **You approve the first real runs,** then switch on the parts you trust.

05 Training

- **A walkthrough of each agent** with me, plus a short video of each to keep.
- **Change a rule in plain English,** like when an order goes trucking instead of UPS.
- **See what each agent did** on any order or lead, and why.
- **Pause either agent** anytime.
