THE SIMPLE VERSION · START HERE, BUILD ON IT LATER

Two agents, inside the Claude you already use.

Nothing new to log into. You talk to them the way you talk to Claude now.

01 The software

Claude
Both agents live here as Claude skills. It's where you talk to them.
You have it

Claude in Chrome
Lets the lead agent read forums and message people from your browser.
Browser add-on

Your email
Invoices and shipment notices go out from your own address.
You have it

Your files
A folder for every order, and one sheet that tracks each order and lead.
Drive or similar

UPS and your trucker
UPS labels and bills of lading, made from each order.
Your accounts

If you already use invoicing software, it stays and the agent works with it. We'll confirm each piece on the call.

02 How you talk to them

Paperwork agent
In your Claude
SAMPLE

New order 1048. Two pallets, 640 lb, ship to Ridgeway Supply.

Done. Invoice sent, trucking BOL filled in, both filed. The shipment notice with tracking is ready. Send it?

Invoice 1048.pdf | BOL 1048.pdf

Send it.

Lead ready for you
A forum member replied asking for pricing.

Rather talk than type? Use voice in the Claude app.

03 What each agent does

Paperwork agent
Every order, start to finish
Agent 1

IN → An order comes in → Invoice made and sent → UPS label or trucking BOL → Filed in the order's folder → OUT: Customer gets tracking

Lead generation agent
Finds buyers, hands them to you
Agent 2

IN → Searches your buyers' forums → Messages people where allowed → Tracks every reply in your sheet → OUT: Tells you when one is ready for you

04 Setup

1. **15 minute call** on your software, how you invoice and ship, and your forums.
2. **I build both agents** in your Claude account.
3. **We test on sample orders** before anything reaches a customer.
4. **You approve the first real runs,** then switch on the parts you trust.

05 Training

- **A walkthrough of each agent** with me, plus a short video of each to keep.
- **Change a rule in plain English,** like when an order goes trucking instead of UPS.
- **See what each agent did** on any order or lead, and why.
- **Add a forum or edit a message** yourself.

06 Day to day

- **Orders.** Paste or forward the order, check the summary.
- **Leads.** You only hear from it when someone is ready for you.
- **Usage.** Runs on your Claude plan, only when there's work.
- **Control.** Pause either agent anytime. Every document and message is saved.

07 Building on it later

ONLY WHEN YOU WANT IT

NOW
Chat or talk in Claude
You start each run and see every result.

→

NEXT
Runs on its own
Starts by itself when an order or a forum reply comes in.

→

LATER
The dashboard from the video
One screen for every order and lead, once volume grows.
