SALES CALL SCRIPT

AI Lead Response System — HVAC & Roofing Contractors

Warm Leads · Full Call Flow · Word-for-Word

Tier 1: $2,000 setup + $300–500/mo | Tier 2: $5,000 setup + $300–500/mo

QUICK REFERENCE — 13-STEP CALL MAP

1	CALL CONTROL	Set frame. Confirm time. Get 2 micro-yeses in 60 seconds.
2	DIAGNOSE	5 layers: Surface → Mechanism → Impact → Attempts → Priority. Never pitch here.
3	QUANTIFY	Make cost visible. Missed leads × job value = monthly leakage number.
4	QUALIFY	3 gates: Fit, Priority, Ability. No timeline = no deal.
5	DECISION MAP	Who signs? Who blocks? What's the process? Map before you pitch.
6	VALUE FRAME	Outcome first. Mechanism second. Tool talk last (or never).
7	CHALLENGE	Use throughout. Slow voice. Short sentences. Permission then reframe.
8	OBJ. PREVENT	Ask: what must be true to say yes? What could block internally?
9	OBJ. HANDLE	Clarify → Isolate → Reframe → Confirm. Never argue.
10	COMMITMENT	Sell the next step (pilot). Lock it on calendar before call ends.
11	PROPOSAL	Never send without a booked review call. Send to confirm, not convince.
12	FOLLOW-THROUGH	8-line recap email within 1 hour. Advances + next step + ownership.
13	EXIT RULES	Disqualify clean. Never chase. Leave the door open.

! Steps 7 (Challenge), 8 (Objection Prevention), and 9 (Objection Handling) are not fixed positions — deploy them anywhere in the call when needed.

STEP 1	CALL CONTROL Own the first 60 seconds or spend 30 minutes recovering

CONTEXT

They responded to your cold email or ad. They know roughly what you do. Your job now is to establish peer-level frame, run a quick diagnostic, and get two micro-yeses before you ask anything real.

OPENING SCRIPT — Word for Word

"Hey [Name], this is Lorenzo — good to connect. You've got a few minutes?"

→ *[They say yes]*

"Perfect. Here's what I want to do — I'm going to ask you a few questions about how you're currently handling inbound leads and what it's costing you. If I think there's a real fit, I'll tell you exactly what I'd recommend and what the next steps look like. If there's no fit, I'll tell you that too and we won't waste each other's time. Sound fair?"

! Two micro-yeses collected: 'You've got a few minutes?' + 'Sound fair?' — call is now a joint process, not a pitch.

IF THEY ASK 'WHAT IS THIS EXACTLY?' BEFORE YOU FRAME

IF THEY SAY...	YOU SAY...
"What exactly do you do?"	"Good question — we install AI-powered lead response systems for contractors. But before I explain what that looks like, I want to make sure it actually applies to your situation. Can I ask you a couple questions first?"

STEP 2	DIAGNOSIS **Find the real problem. Do NOT pitch here.**

! These questions flow in sequence. Do not rush. Do not teach. Do not fix. Just listen and guide.

LAYER 1 — SURFACE: WHAT'S HAPPENING?

"What's going on with your lead flow right now — how are most of your leads coming in?"
"And when someone reaches out — a form, a call, whatever — what happens next on your end?"
"How fast are you typically getting back to them?"

LAYER 2 — MECHANISM: WHERE DOES IT BREAK?

"Walk me through what happens when you're on a job and someone fills out your contact form — who picks that up?"
"What's the messiest part of that process right now?"
"When a lead goes cold, what's usually the reason?"

LAYER 3 — IMPACT: WHAT DOES IT COST?

"How many inbound leads would you say you get in a normal month?"
"Roughly what percentage of those go cold before you can talk to them?"
"And what's the average job worth to you — ballpark?"

! Do the math out loud: 'So if you're getting 40 leads a month and maybe 20% go cold — that's 8 leads. At $3,000 a job, that's $24,000 a month not being captured. Is that directionally accurate?'

LAYER 4 — ATTEMPTS: WHAT HAVE THEY TRIED?

"What have you tried so far to fix this — any tools, hire someone, anything?"
"Why do you think it hasn't been solved yet?"
"What are you worried would happen if you tried to fix it again?"

LAYER 5 — PRIORITY: WHY NOW?

"Why is this something you're looking to fix now rather than just letting it ride?"
"Where does this sit compared to everything else on your plate right now?"
"If nothing changes in the next 90 days, what happens?"

DIAGNOSIS CLOSE — SUMMARY RESTATE

Say this before moving on
"Let me make sure I've got this right — you're getting [X] leads a month, somewhere around [X]% are going cold because there's no one available to respond fast. You've tried [X], and it hasn't stuck because [X]. And this is a real priority now because [X]. Is that accurate?"

STEP 3	QUANTIFY **Convert the problem into a number. This is where urgency becomes real.**

THE BACK-OF-NAPKIN FORMULA

"Here's how I think about this — [X] leads a month, [X]% go cold. That's [X] leads. At an average job value of $[X], you're looking at roughly $[X] a month that never converts."

"That's not pressure — that's just what's happening. Is that directionally accurate?"

ANTI-PITCH RULE — HOLD THE FRAME

After quantifying, do NOT jump into your solution. Ask this instead:

"If we fixed this in the next 30 days — leads responded to in under 2 minutes, follow-ups automated — what would that unlock for you?"

→ Let them answer. They've now self-committed to the outcome.

"How urgent is it to fix this right now?"

STEP 4	QUALIFY **Confirm 3 gates before you go further. Respect your time and theirs.**

QUALIFICATION FRAME

"Let me ask you a few straight questions just to confirm this is worth solving together. If it is, we'll map the cleanest next step. If it isn't, I'll tell you that."

GATE 1 — FIT

"If we solve the lead response problem — does that actually move the needle, or is there a bigger issue underneath it?"

"What happens if this stays the same for another 90 days?"

GATE 2 — PRIORITY

"On a scale of 1 to 10, how urgent is fixing this — 10 being you need it done yesterday?"

"What else is competing for your attention right now?"

GATE 3 — ABILITY

"Is budget already allocated for something like this, or would it need approval?"

"What's the normal process if you decide to move forward on something like this — is it just you, or does someone else need to weigh in?"

TIMELINE QUESTION

"When would you want to have this problem solved by — is there a date you're working toward?"

QUALIFICATION CLOSE — SUMMARY

"Okay — based on what you've said, this is a real priority, the cost is roughly $[X]/month, you want it fixed by [X], and [you can decide / you need to loop in X]. Is that accurate?"

STEP 5	DECISION MAP **Know who signs, who blocks, and what kills it before you pitch.**

The One Question That Maps Everything

"Before I walk you through what this looks like — can you walk me through how you make decisions like this?"

→ Stop talking. Listen for: who signs, who influences, what the process looks like, and whether you're talking to the buyer.

FOLLOW-UP QUESTIONS

"When something like this gets approved — whose name is on the spend?"

"Who else would weigh in on this decision — ops, a partner, anyone?"

"What usually stops things like this from going ahead internally?"

"If we decide to move, what could block it — budget approval, legal, something else?"

IF YOU'RE NOT WITH THE ECONOMIC BUYER

"If this makes sense, what's the fastest path to get this in front of the person who approves it?"

DECISION MAP CLOSE

"Just so I'm aligned — you're the final sign-off [or X also weighs in], and the next step would be [X]. Is that right?"

STEP 6	VALUE FRAME **Outcome first. Mechanism second. Tool talk last — or never.**

!	You've diagnosed, quantified, qualified, and mapped the decision. Now you've earned the right to propose. Outcome first. Do not explain the tech.

VALUE FRAME SCRIPT

"Based on everything you've told me — the core issue is leads going cold because there's no fast response. The cost is roughly $[X] a month in missed revenue."

"The outcome we're targeting: 100% of inbound inquiries get a response within 2 minutes, measured, in 14 days."

"The way we get there is simple — we catch every lead the moment it comes in, respond instantly so they don't go cold, and follow up automatically until they book. You never lose a job because you were busy on a roof."

"Nothing gets added to your team's plate. We build it, test it, and hand it over. One session to walk your team through it."

"If nothing changes, you keep losing that $[X] every month. The fix removes that bottleneck."

IF THEY ASK HOW IT WORKS — ANSWER IN LAYERS

IF THEY SAY... **"How does it actually work?"**	YOU SAY... "Simple workflow — we catch the lead, respond automatically, follow up until they book. [Pause] If you want more detail: it connects to whatever you're already using and runs on rules we set together. [Only if pushed further]: It plugs into your CRM and booking tool so everything triggers automatically."

TIER SELECTION — WHEN TO INTRODUCE

"There are two ways we do this — a focused version that solves the immediate problem, or a full system that also handles calls when you can't pick up and follows up after quotes go out."

"Based on what you've told me, [Tier 1 / Tier 2] makes the most sense to start. Here's why..."

VALUE FRAME CLOSE — LOGICAL CHECKPOINT

"If we can deliver that outcome in 14 days and remove that monthly cost — would you want to see the clean next step?"

STEP 7–9	CHALLENGE + OBJECTION PREVENTION + OBJECTION HANDLING Deploy anywhere in the call

STEP 7 — CHALLENGE SKILL (USE WHEN CONVERSATION DRIFTS)

Pattern: Anchor → Permission → Reframe → Better Path

IF THEY SAY...	YOU SAY...
"We just need more leads — can you run ads too?"	"Totally fair. Can I push back on that for a second? More leads into a slow response system just means more cold leads. Before adding volume, let's fix the leak. Otherwise you pay twice."
IF THEY SAY... **"We want something quick and cheap."**	YOU SAY... "I hear you. Quick and cheap is doable — but quick and cheap outcomes usually follow. The question is: do you want a system that looks good or one that actually books jobs? We can do a contained pilot fast — we just don't cut corners that protect the outcome."
IF THEY SAY... **"What AI are you using? Is it ChatGPT?"**	YOU SAY... "Tool choice doesn't really affect your result. What matters is whether leads stop going cold. Let's define the outcome first, then the tool is just the mechanism."
IF THEY SAY... **"Can you also add [X, Y, Z]?"**	YOU SAY... "We can — but that's a scope change, which shifts timeline and cost. The clean way: we nail the core outcome first, then we expand. That's also how you protect delivery."

STEP 8 — OBJECTION PREVENTION (ASK BEFORE YOU PROPOSE)

2 Questions That Kill 80% of Objections

"Before I lay out the next step — what would you need to see or believe for this to be an obvious yes?"

"And what could stop this from moving forward even if it made sense to both of us?"

→ Listen for: budget approval, internal blocker, bad past experience, tool overlap, timing.

"Is there anything you're unsure about — even though the outcome sounds attractive?"

STEP 9 — OBJECTION HANDLING (CLARIFY → ISOLATE → REFRAME → CONFIRM)

OBJECTION	CLARIFY	REFRAME	CONFIRM
Too Expensive	**Is it expensive vs. budget, or vs. value?**	**You're already losing ~$X/month in cold leads. The pilot is contained — we prove it before full rollout.**	**If the pilot proves the outcome, is budget still a blocker?**
No Time	Is it your team's bandwidth, or a new project you don't want?	This gives you time back. Your input is minimal — we handle the build.	If we keep your inputs to [X], can we take the next step?
Already Have a Tool	**What outcome was that tool meant to deliver — is it delivering today?**	**Tools don't matter if the outcome is missing. The gap is what's costing you.**	**If we prove the outcome without disrupting what you use — is that fair?**

Need to Think	Is it priority, risk, or missing information — which one?	Let's get the real concern out so you can decide cleanly. Staying in limbo has a cost.	What would make this an obvious yes or no?
Bad Time Right Now	**Is it budget cycles, workload, or just not a priority yet?**	**The leakage is monthly. Delaying has a price. Run a small mapping now so when timing opens you're ready.**	**If timing was ideal, would you do it?**

STEP 10	**COMMITMENT ENGINEERING** **Sell the pilot. Lock the calendar before the call ends.**

! Never propose a full rollout on the first call. Sell the pilot. Risk goes down, decision gets easier.

COMMITMENT SCRIPT

"Based on everything you've told me, the clean next step isn't a full system rollout — it's a 14-day pilot of the Instant Response System."

"Here's what that means: we build it, test it, and you measure the result. If it proves the outcome — leads responding in under 2 minutes — then we decide whether to expand. If it doesn't, we figure out why before you're in deeper."

"The investment to start is $2,000 setup and $300–500 a month after. Does that make sense?"

→ *[Yes] Proceed to calendar close.*

→ *[Question] Go to objection handling — clarify, isolate, reframe.*

CALENDAR CLOSE — NON-NEGOTIABLE

"Perfect. Let's get it on the calendar now so we're not playing email tag."

"I have [Day] at [Time] or [Day] at [Time] — which works better?"

"Great. I'll send the invite now. Once that's booked, I'll send a short recap so you and your team can get aligned before we start."

WHAT GETS LOCKED BEFORE YOU HANG UP

YOU OWE	THEY OWE
Send calendar invite	Confirm attendance
Send 8-line recap email	Share lead source access
Send onboarding doc	Share calendar/booking tool
	Provide business hours + service area

STEP 11	**PROPOSAL DISCIPLINE** **Never send without a booked review slot. Send to confirm, not convince.**

! Only send a proposal if: multiple stakeholders need docs, procurement requires it, or scope needs clarity. Most of the time — skip it.

PROPOSAL KILLERS + RESPONSES

IF THEY SAY...	YOU SAY...
"Just send me pricing."	"Happy to — but price without scope is meaningless. Let me send the outcome, scope, and investment together so it's clean."

IF THEY SAY...	YOU SAY...
"We're getting a few quotes."	"Makes sense. Just compare outcomes and scope, not just price. Tell me what they're quoting and I'll tell you what's missing."

IF THEY SAY...	YOU SAY...
"Send something first."	"I will. I just don't want it to go nowhere in your inbox. Let's book 15 minutes now and I'll send a summary to support that conversation."

IF YOU SEND A PROPOSAL — INCLUDE THIS LINE

"Don't review it alone — it's designed to be a 10–15 minute walkthrough so we can align and decide together. We're still on for [Day] at [Time]."

STEP 12	POST-CALL FOLLOW-THROUGH **Send the recap email within 1 hour. Deals die in inboxes.**

!	Your recap email is what survives when they go from your call back into their meetings and inbox. If it's not written down, it will be garbled when they retell it internally.

Subject	**Recap + Next Steps — Reduce Lead Response Time — [Day] [Time]**
Line 1	Quick recap from our call — we're aligned on the core issue and next step.
Line 2 (Problem)	**Leads are going cold because of slow or no response — costing you jobs.**
Line 3 (Cost)	Based on your numbers: ~[X] leads/month go cold = ~$[X] in monthly leakage.
Line 4 (Outcome)	**Goal: 100% of inbound inquiries responded to in under 2 minutes, live in 14 days.**
Line 5 (Constraint)	Pilot scope stays contained — we only build [X] first before expanding.
Line 6 (Next Step)	**We run a 14-day pilot of the Instant Response System to prove the outcome.**
Line 7 (Ownership)	I'll send the onboarding doc. You provide: access to lead source + calendar + business hours.
Line 8 (Calendar)	**We're booked for [Day, Date] at [Time]. See invite.**
Fwd Paragraph	We're addressing slow lead response, currently costing ~$[X]/month, with a contained 14-day pilot to prove sub-2-minute response time before any rollout.

STEP 13	EXIT RULES **Disqualify clean. Never chase. Leave the door open.**

DISQUALIFY WHEN YOU SEE ANY OF THESE

RED FLAGS	EXIT SCRIPT
No priority or timeline	"Sounds like this isn't live enough to act on right now. If that changes, message me and we'll reopen it."
No decision-making authority	**"Let's pause until we can get the right person on a call."**
Price-only mindset	"If you're choosing on lowest price, I'm not the best fit — we focus on outcome."
No respect for your process	**"This doesn't feel like a clean fit right now. Good luck with it."**

Ghosting after interest	"Going to close this out for now. If you want to restart, reply with a time."

!	The deals you don't take determine the quality of the ones you do. Disqualification is not failure — it's pipeline hygiene.

ADVERO SOLUTIONS | AI Automation for Home Service Contractors
